SIDE TRIMMER PRESENTATION

The **Side Trimmer** is a major component in every **strip processing line**. Knife gap setting is the most critical parameter in the trimming process, precise adjustment ensure:

- Clean cuts with minimal burr
- Consistent edge quality, less or no saw tooth edges after cold rolling
- Extended blade life

Our **Side Trimming technology** will improve your productivity on your continuous lines; we provide an arrangement with a turret head side trimmer in combination with a tandem scrap cutter. While the line is running it is possible to change the “off-line” Side trimmer knives and the knives of the Scrap Cutter heads which are in maintenance position.

LIGHT GAUGE SIDE TRIMMER KNIFE |

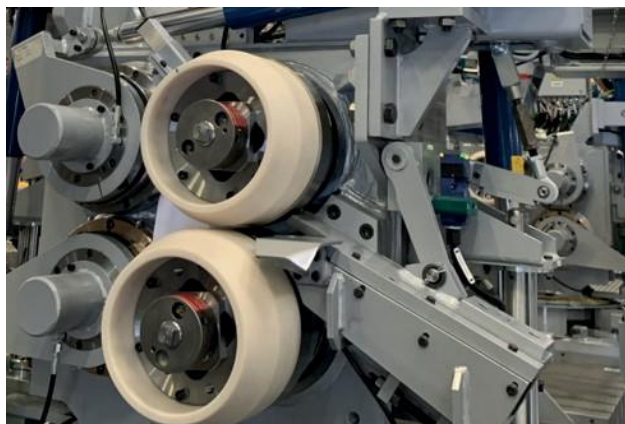

TECHNICAL FEATURES

HIGH PRECISION SIDE TRIMMERS

Diameter: 250mm
Strip Gauge: 0.1 mm – 1.5 mm (2.0 mm)

MEDIUM GAUGE SIDE TRIMMER KNIFE |

TECHNICAL FEATURES

HIGH EFFICIENCY SIDE TRIMMERS

Diameter: 300mm
Strip Gauge: 0.2 – 4.0 mm

HEAVY GAUGE SIDE TRIMMER KNIFE |

TECHNICAL FEATURES

HIGH PERFORMANCE SIDE TRIMMERS

Diameter: 450mm
Strip Gauge: 0.8 – 7.0 mm
