

ANGLGEAR™: MADE IN THE USA, POWERING INDUSTRY WORLDWIDE

Andantex USA's objective over the years has always remained the same: to provide innovative, high-quality gearboxes and solutions for use on industrial machinery. The Anglgear™ right angle drive is an example of our commitment to our customers' needs and applications. Since purchasing this product line more than 30 years ago, the Anglgear has grown into a product that is now used in various applications across the printing, converting, packaging, general purpose and aerospace industries. In addition, we also supply all branches of the military, conforming to contracts specifying various MIL SPEC requirements.

14 DIFFERENT MODELS, AVAILABLE IN BOTH AN INCH AND METRIC SERIES

The Anglgear™ line consists of 14 different models, available from stock in both an Inch and Metric series and sold worldwide. ***We take pride in the fact that all Anglgear drives are made in the USA, at our headquarters in New Jersey. Here, we manufacture, assemble and inspect every unit that goes out the door.*** This ensures consistent quality in all of our gearboxes.

Our standard units are available from stock in 1:1 and 2:1 ratios, with 2 shafts or 3, 2 flanged or 3 flanged units, and are lubricated for life before being shipped.

Each housing is precision-machined on our CNC machining center and coated with a chemical film plating to protect the material. In addition, we offer special materials and coatings for protection in corrosive environments. All housings receive NADCAP certification, and have flanged ends and side bosses for compact installation in a wide range of applications.

Over the past 10 years, we have seen that a huge part of our growth in this line is due to the fact that we will modify our units to meet our customers' design specifications. It doesn't matter if it's a one-piece special order or a quantity order; our engineers will work with our customers to give them the best solution for their application and needs.

Examples of our modifications include various shaft lengths and configurations, including shafts with flats, splines, holes, etc. We also offer 3-way units with counter-rotating output shafts, as well as custom housings with flanges and bosses removed for custom mounting applications, special materials, bearings, seals and epoxy coatings as needed. We can provide units with special backlash upon request, and offer various options for grease including food grade, high temperature and radiation resistant.

Grease Lubricated

Hardened Bevel Gears

Universal Mounting Positions

Double Sealed Ball Bearings

Cast Aluminum Housings

Stainless Steel Shafts Type 416**

IN ADDITION TO THE ANGLGEAR PRODUCT LINE, ANDANTEX OFFERS AN EXTENSIVE RANGE OF RIGHT ANGLE GEARBOXES TO MEET THE QUALITY, PERFORMANCE, AND REQUIREMENTS OF YOUR APPLICATION NEEDS.
